

Lisa Groen

SOFTWARE ENGINEER

ABOUT ME

Software engineer with a strong interest in real-time applications, including game development and embedded systems. Experienced working with emerging technologies such as VR/AR and computer vision. I like the problem-solving aspect and creative thinking that writing software requires, and like to dig deep and learn new technologies to come up with innovative solutions.

Amsterdam

November 26, 1998

EXPERIENCE

Research Intern | UMC Utrecht

Utrecht | Sep. 2024 – Apr. 2025

Developed a computer vision pipeline for camera-based sleep stage classification of preterm infants, using eye cues.

AR Software Engineer | Miracle Mile

Tokyo | Jan. 2021 – Oct. 2021

Developed AR applications for the Microsoft HoloLens 2, and for Apple and Android devices, featuring realtime online cross-platform capabilities. Created interactive embedded hardware connected to AR devices to enable synchronized interactions. Showcased applications at conferences.

Game Programming Intern | Shinyuden

Tokyo | Mar. 2020 – Aug. 2020

Focused on game concepting and design, game programming (C#, Unity Engine), and 3D landscape generation for a JRPG.

VR Software Engineer Intern | Therapieland

Amsterdam | Sep. 2019 – Jan. 2020

Designed and implemented an experimental VR application for anger-management therapy, targeting the HTC Vive. Focused on mesh generation, gameplay concepting, and 3D modeling.

Software Engineer Intern | Digital Society School

Amsterdam | Jan. 2018 – Jul. 2018

Developed an interactive bracelet designed to encourage physical activity in young asthma patients. Contributed to concept development, rapid prototyping, peer testing, static website creation (HTML/CSS), and embedded software development.

SKILLS

- OOP Programming (C#, C++)
 - Game Programming (Unity, UE)
 - Computer Vision (Machine Learning, OpenCV, Tensorflow)
 - VR/AR Development (HoloLens, HTC Vive, mobile)
 - Embedded Software (Arduino, BLE, sensors)
 - Software Optimization (GPGPU (OpenCL), SIMD)
 - Frontend (HTML, CSS, Javascript, React)
 - 3D Modeling (Blender, Maya)
-
- Driver's License

LANGUAGES

Dutch (Native)

English (Fluent)

Japanese (JLPT N2)

HOBBIES

- Music
- Crochet
- Cooking (& eating)
- Gaming

EDUCATION

Game and Media Technology (Master)

Utrecht University

2023 – 2025

Computer Vision (Machine Learning, Tensorflow, OpenCV), software optimization (GPGPU, OpenCL, SIMD), ray tracing, serious gaming, HCI, 3D data querying, data visualization, game physics.

HBO-ICT – Game Development (BSc.)

Amsterdam University of Applied Sciences

2016 – 2020

Object oriented languages (C#, C++, Java), game engines (Unity, Unreal Engine, Game Maker), web development, SQL, embedded systems development, game development and VR/AR development.

Japanese Language

Academy of Language Arts

2021 – 2022

Focused on learning Japanese Language for daily and business use, conversational and written Japanese (speaking, reading, writing).

EXTRACURRICULAR ACTIVITIES

Teaching Assistant | University Utrecht

Utrecht | Sep. 2024 – Nov. 2024

Teaching Assistant of the course Multimedia Retrieval, providing practical assignment lectures and support.

Chair | U-pad

Utrecht | Sep. 2023 – Sep. 2024

Chair of the first board of a new gaming student association in Utrecht. Focused on attending board meetings, organizing events, and communication with members and externals.
