Software engineer, mostly experienced within the field of game development and VR/AR development.
Open to learning all kinds of skills within the field of software engineering.

SKILLS

Programming Languages: C#, Python, C++, HTML, CSS, Javascript

Tools/Libraries: Unity (VR/AR), Unreal Engine, Blender, Maya, React, OpenCV, Tensorflow, OpenCL, Arduino

EXPERIENCE

- | | |
|-------------------|--|
| 09/2024 - 04/2025 | Research intern , UMC Utrecht – Utrecht
Developing a computer vision pipeline for camera-based sleep stage classification of preterm infants, using eye cues. |
| 09/2024 - 11/2024 | Teaching Assistant , Utrecht University – Utrecht
Teaching Assistant of course Multimedia Retrieval, providing practical assignment lectures and support. |
| 09/2023 - 09/2024 | Chair , U-pad (student association) – Utrecht
https://u-pad.nl
Board meetings, organizing events, Communication with members and externals. |
| 01/2021 - 10/2021 | AR software engineer , Miracle Mile – Tokyo, Chiyoda-ku
https://miraclemile-inc.com/
Mobile AR development (Apple, Android), AR development for head mounted hardware (Hololens 2). IoT development using Arduino and M5Stack. Realtime online cross-platform application development. |
| 03/2020 - 08/2020 | Game programming intern , Shinyuden - Tokyo, Chiyoda-ku
https://www.shinyuden.com/
Game concepting and design, game programming (C#, Unity Engine), 3D landscape generation. |
| 09/2019 - 01/2020 | VR software engineer intern , Therapieland - Amsterdam
https://therapieland.nl/
VR software development (HTC Vive), mesh generation, game concepting and design, 3D modeling (Maya). |
| 01/2018 - 07/2018 | Software engineer intern , Digital Society School – Amsterdam
https://digitalsocietyschool.org/
Concept creation, prototyping and peer testing, static website development (HTML, CSS), embedded systems (Arduino, C). |

EDUCATION

02/2023 - 06/2025

Game and Media Technology (Master's)

Utrecht University – Utrecht

Computer Vision (Machine Learning, Tensorflow, OpenCV), software optimization (GPGPU, OpenCL, SIMD), ray tracing, serious gaming, HCI, 3D data querying, data visualization, game physics.

11/2021 - 12/2022

Japanese Language

Academy of Language Arts – Tokyo, Iidabashi

Focused on learning Japanese Language for daily and business use, conversational and written Japanese (speaking, reading, writing).

09/2016 - 08/2020

HBO-ICT - Game Development (Bachelor's)

Amsterdam University of Applied Sciences – Amsterdam

Object oriented languages (C#, C++, Java), game engines (Unity, Unreal Engine, Game Maker), web development, SQL, embedded systems and IoT development, game development and VR/AR development.

Languages

- Dutch (native)
- English (fluent)
- Japanese (JLPT N2)
